

Data Dashboards

INSTANT ACCESS TO KEY INFORMATION

OMNI develops data dashboards to support groups and organizations working in the public interest communicate their results. We utilize best practices in data management and visualization to provide interactive data displays that highlight and provide a snapshot of key data points.

VISIONING & BLUEPRINTING

OMNI staff work with you to select data indicators that help tell your organization's story, monitor important trends, or answer your data questions.

Using best practices of selecting and displaying data, OMNI will develop a mockup of the dashboard that will show the overall layout and recommended ways to display selected indicators as data visualizations.

OMNI staff utilizes a collaborative approach to designing data dashboards. Using the mockup, you will have the opportunity to provide input before the dashboard has been built.

DATA DISCOVERY & VISUALIZATION

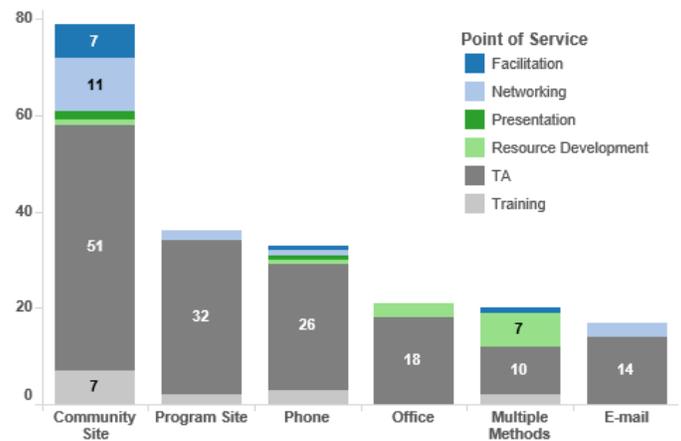

Our staff has expertise in publicly available data. We support the selection of reliable and appropriate indicators, and we can access and compile data for you, as desired.

We can also utilize data housed at your organization that you would like to display. This review may include recommendations for your data collection practices.

FEATURES OF OMNI'S DATA DASHBOARDS

- Interactive
- Highly customizable
- Easily digestible
- Multi-sourced data displays
- Integration with existing data systems
- Filtering and different data view options
- Available technical support

We will also alert you to potential limitations about the data quality or structure. Our staff will determine what is needed to prepare the data for display and recommend how to optimally visualize the selected data.

DASHBOARD BUILDING

OMNI staff is trained in two different dashboard software platforms: Dundas Dashboards and Tableau. Depending on your overall dashboard needs, we will recommend the platform that we believe will work best.

The dashboard will then be built based on the mockup that you've approved.

Services include compilation, display, and use of data to promote organizational learning, continuous quality improvement and performance management.

DEMONSTRATIONS & TECHNICAL ASSISTANCE

Our staff will show you how to navigate through your completed dashboard. We also can provide a virtual or in-person presentation to your staff, your stakeholders, or anyone else who interacts with your dashboard.

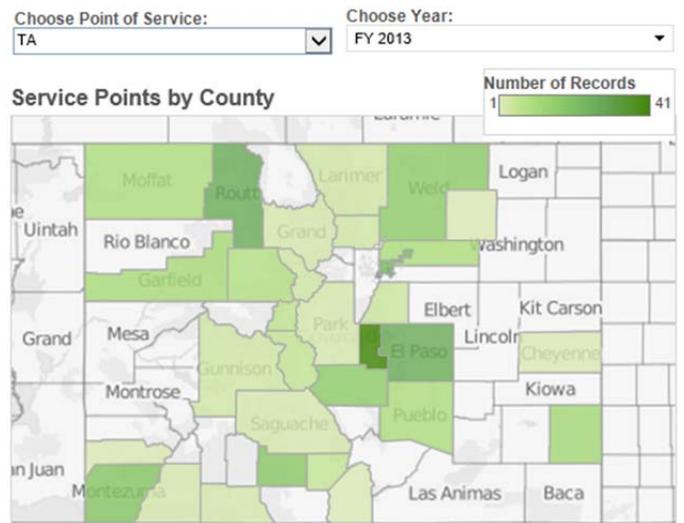

Our experts also can provide more ongoing guidance on how to interpret the data displayed in your dashboard, as well as on the refinement of indicators and collection over time.

We also offer technical assistance in viewing and sharing the dashboard.

OTHER SERVICES AT OMNI

OMNI works with nonprofits, communities, and governmental entities to develop, conduct and link assessment, planning, and evaluation.

We offer a range of evaluation services, including logic models, measure selection and development, data collection and data quality processes and protocols, statistical and qualitative analyses, and stakeholder deliverables.
